Code Snippet

Embedding Your Widget

- When satisfied with your widget's appearance, click the tab labeled "Code Snippet."
- Here, you will find the generated HTML code corresponding to your specific widget setup.
- We've included clear instructions on how to install the widget, whether you are using WordPress, Squarespace, or Wix.
- Simply click the "Copy Code" button, and the HTML code will be automatically copied to your clipboard.
- Paste this code within your website to showcase the widget.

WordPress
To add a widget to your Wordpress website, follow these steps:
1. Add an HTML block to your page.
2. Copy the Widget code and paste it into the newly added HTML block.
3. Save and publish your changes.
Check Wordpress help portal for more details: <https://wordpress.com/support/wordpress-editor/blocks/custom-html-block>
